PROFILE

A Software Engineer with 5+ years of experience delivering end-to-end, full-stack and data-driven solutions across healthcare and language technologies, including processing data from wearable devices, medical imaging, digital pathology (WSI), and NLP.

SKILLS

- JavaScript, Typescript, Python, Node.js, React, Nest.js, Express.js, HTML, CSS, SQL, PostgreSQL, MongoDB.
- CI/CD, AWS, JIRA, and healthcare data interoperability standards; SMART, FHIR, Redox, LibreView.
- Converting UI/UX design into React components, architecting API

WORK EXPERIENCE

Lesan AI

Software Developer / Data Scientist

Apr 2022 – Dec 2024

Berlin, Germany/Remote

- Re-architected & transformed the [Lesan AI](#) web application, significantly improving performance and scalability while integrating new capabilities, including an ASR module ([beta.lesan.ai](#)).
- Designed and developed a [Language tech leaderboard platform](#) to support benchmarking and research evaluation.
- Conducted systematic (human & automatic) evaluation of Lesan.ai models, identified performance gaps, and proposed research-driven improvements to enhance system accuracy and robustness.
- Led [Afro chest X-ray](#) data collection, a research project that targeted 50,000 images with diagnostic results.
- Cleaning, formatting, packaging, auditing the medical images acquisition pipeline, and building baseline ML model.

Upwork

TOP-RATED Full-Stack Freelancer with 100% Job Success Score

Jun 2022 – Feb 2025

Remote

- [Implemented Ambulatory Glucose Profile \(AGP\)](#) report for Continuous Glucose Monitoring data visualization.
- Built a [diabetes intervention system](#) that leverages the AGP to help clinicians make decisions during patient study.
- Processed and standardized CGM data from CGM devices to visualize personalized glucose patterns for patients.
- Implemented an [international shipment logistics](#) application and integrated a customer support AI chatbot.
- Translated a healthcare data server management system UI/UX Figma design into a functional react application.

HorizontechICT Solution

Software Developer

Jun 2021 – Jan 2023

Addis Ababa, Ethiopia/Site

- Developed an application with nine role types for a POS machine import company, which tracks machine delivery status to end customers and during annual maintenance.
- Migrated an existing SQL database to a NoSQL database (MongoDB).
- Designed database and component architecture, conducted code reviews, prepared application maintenance guidelines, and worked closely with company clients.
- Build a NodeJS backend application for an e-commerce platform with mobile, web, and admin panel React apps.

Awura PLC

Frontend Engineer

Feb 2022 – May 2022

Addis Ababa, Ethiopia/Remote

- Converted a Figma design of a localization system dashboard into a React application with the Ant-D UI tool.
- Integrated local payment methods and implemented an NPM package that localizes all Ethiopian Languages.

EDUCATION

Mekelle University, Ethiopian Institution of Technology-Mekelle (EIT-M)

Bachelor of Science Degree in Information Systems

Oct 2017 – Dec 2020

Mekelle, Ethiopia

- CGPA: 3.81
- COURSES: Object Oriented Programming, Data Structure & Algorithm, Discrete Mathematics, Database Systems, Introduction to AI, Data Mining and Warehousing, and System Analysis and Design.
